

YOUR CARE. YOUR INFORMATION. RIGHT AT YOUR BEDSIDE.

We understand hospital stays can feel overwhelming and want you to be confident in your care. That's why we offer MyChart Bedside — a tool within the MyChart app that helps you stay connected and informed during your stay.

With MyChart Bedside patients in the hospital and their care partners can:

- See who's on your care team
- Check your daily schedule, medications and test results
- Learn more about your condition
- Keep loved ones updated and informed

Download the MyChart app for iOS or Android phones on the app store today!
